Chaos

# Many organisations get overwhelmed

# Saying "Trust Me" isn't enough

# Completion Bonds

# Benefits

**\* Consultants aren't trusted – they don't have skin in the game.**

## ■ Buyer gains:

- Confidence to take risks
- Trusted third party to explain and mediate\*
- Wider market (small players have similar risk to large ones)

## ■ Seller gains:

- Level playing field for small players
- Trusted third party to explain and mediate\*
- Savvy customers

## ■ Insurer gains:

- Premiums

# Why can films afford the premiums?

- Team
  - Defined roles
  - Known track record
  
- Charter
  - Script describes what they'll get (but can be flexed)
  - Known budget elements, with detailed costings
  
- Common practices
- Visible progress
- Way to value IPR

**I think agile approaches have, or could have, many of these elements**

# My questions

- Imagine you are an insurer assessing the premium for a completion bond for a project. What would you look for –
  - in the **team**
  - in the **client**
  - in the **environment**
  - in the **project**when assessing the premium?
- What actions would you take to manage your risk?
- What would enable you to reduce your premiums?
- What would increase them?

---

**If we had these things, how would that change the way we work?**

**If completion bonds were available, how would that change the type of work we do?**

**What do we need to do to make these things happen?**

# Thank You

## ■ **Making sense of technology...**

- Many organisations are caught up in the complexity of technology and systems.
- This complexity may be inherent to the technology itself. It may be created by the pace of technology change. Or it may arise from the surrounding process, people and governance structures.
- We help untangle this complexity and define business strategies that both can be implemented and will be adopted by people throughout the organisation and its partner network. We then help assure delivery of implementation projects.

## ■ **Clients...**

- **Cisco Worldwide Education** – Architecture and research for e-learning and educational systems
- **Council of Europe** – Systems for monitoring compliance with international treaties; e-learning systems
- **Dover Harbour Board** – Systems and architecture review
- **European Agency** – ECM Roadmap
- **MessageLabs** – Architecture and assurance for partner management portal
- **National Savings & Investments** – Helped NS&I and BPO partner develop joint IS strategy
- **The Open University** – Enterprise architecture, CRM and product development strategies
- **Oxfam** – Strategy for content management, CRM, e-Commerce
- **Thames Valley Police** – Internet Consultancy
- **Sony Computer Entertainment** – Global process definition
- **Amnesty International, Endemol, tsoosayLabs, Vodafone, ...**
